

SOHAM GHOSAL

Full Stack Java Developer | Payments and Financial Reporting | Spring Boot Kafka Angular AI/GenAI
+91 98749 69948 · sohamghosal90@gmail.com · Kolkata, India · linkedin.com/in/soham-ghosal-889a13172

SUMMARY

Full Stack Java Developer with ~4 years of experience delivering production-grade, cloud-native payment and financial reporting systems for global enterprise clients. Proven ability to own features end-to-end, from backend API design and event-driven architecture to frontend delivery and production support. Recognized for driving measurable impact: designed an aggregation architecture that reduced report generation time by 80%, recognized as an internal innovation by senior leadership. Actively integrates GenAI into engineering workflows; built and deployed a production RAG assistant endorsed by client leadership, and leverages AI tools daily to accelerate delivery.

TECHNICAL SKILLS

Languages: Java 8/11 (J2EE), SQL, PL/SQL, Python, TypeScript, JavaScript

Frameworks: Spring Framework, Spring Boot, Spring MVC, Spring Security, Hibernate, REST APIs, Microservices, Angular

Data and Messaging: Apache Kafka, IBM DB2, MySQL, Oracle, PostgreSQL, JUnit, TestNG, Mockito

Security: OAuth2, OIDC, PCI-DSS, SonarQube, Checkmarx (SAST), BlackDuck (SCA)

Cloud and DevOps: AWS (EC2, S3, Lambda, SQS), Docker, Kubernetes, Jenkins CI/CD, GitHub, Splunk, Linux, Jira

AI and GenAI: RAG Pipelines, LLM Integration, Vector Databases, LangChain, LangGraph, MCP, Claude, GitHub Copilot

Domain: FinTech, Payment Processing, Merchant Reporting, Settlement and Reconciliation, Incident Analysis, Agile/Scrum

PROFESSIONAL EXPERIENCE

Java Full Stack Developer

July 2022 – Present

Cognizant Technology Solutions · Kolkata, India

Client: Worldpay | Oct 2024 – Present

- **SURF (Standardized Unified Reconciliation File):** major contributor to this strategic merchant reconciliation product; consolidated 100+ financial accounting fields across payments, disputes, fees, and settlements using Java, Spring Boot, and IBM DB2; engineered aggregation logic, reconciliation calculations, and data validation
- **Reduced report generation time by 80%:** from 4-5 minutes to under 1 minute on million-row datasets, recognized as internal innovation by Worldpay senior leadership; designed a multi-layer aggregation architecture (pre-processing job, staging table, reporting layer); delivered Outstanding Balance Reporting to surface settlement timing gaps
- **Maintained IQ Merchant Portal and SSR ecosystem reliability:** owned incident analysis and production troubleshooting using Splunk, Checkmarx (SAST), and BlackDuck (SCA); collaborated with merchant stakeholders and product owners to resolve client-impacting issues
- **Kafka-based SSO Identity Management service:** authored Java Spring Boot producer and consumer classes for JSON event publishing on global sign-on events; implemented OAuth2/OIDC via Spring Security; configured consumer group offset management and Kafka monitoring to reduce manual provisioning to near-zero

Client: Fiserv | Jul 2022 – Sept 2024

- **Payments360 (P2P/P2M digital payments platform):** refactored monolithic application into independently deployable Spring Boot microservices (split payment, dashboard, task management); containerized with Docker; built Angular UI covering merchant onboarding, billing, and split payment flows; implemented i18n (EN-US, ES-PR) and Zelle-type digital wallet integration

PROJECTS

RAG-Based Merchant Reporting Assistant · Python FastAPI ChromaDB LangChain Claude LangGraph AWS

- **Reduced reporting query resolution from ~15 minutes to under 30 seconds:** domain-specific RAG assistant using FastAPI, ChromaDB, LangChain, and Claude LLM grounded in Worldpay payment reporting data models; adopted by team, approved by client leadership for enterprise production deployment

Figma MCP Integration | Rails to Angular Migration · Claude MCP Figma Angular Rails Groovy

- **Automated UI migration of the MPM merchant portal from Rails/Groovy to Angular:** leveraged Figma MCP with Claude to generate pixel-perfect Angular components directly from Figma wireframes with guardrails; eliminated manual design-to-code translation and significantly accelerated frontend delivery

AWS Lambda Validation Agent (POC) · Python LangChain GPT-4 AWS Lambda SQS S3 Agentic AI

- **Event-driven AI agent triggered via AWS SQS and deployed on AWS Lambda:** built using Python and LangChain with GPT-4; receives validation tasks from SQS, orchestrates multi-step rule checks and data verification through tool-calling, and stores results in S3; fully serverless with zero manual intervention

Event-Driven Booking Agent · Spring Boot Angular AWS Lambda SQS EC2 S3

- **Event-driven booking application with Spring Boot backend and Angular frontend:** extended with an AWS Lambda and SQS agent that processes booking requests, validates availability, and delivers confirmation with zero manual intervention; deployed on AWS EC2 and S3

EDUCATION

B.Tech, Computer Science and Engineering, RCCIIT, Kolkata

2018 – 2022 · CGPA: 9.16

CERTIFICATIONS

Claude Code Architect · Microsoft Certified: Azure Fundamentals · MTA (Microsoft): Security Fundamentals
